

eco cabinet

Eco nasce da un gesto fluido e naturale. Sospeso e leggero, il volume si sviluppa attraverso curve morbide e aperture asimmetriche che incidono la superficie come segni nella materia. Il risultato è un cabinet dall'estetica essenziale e scultorea, in cui funzione e forma convivono in perfetto equilibrio.

Eco emerges from a fluid and natural gesture. Suspended and lightweight, its volume unfolds through soft curves and asymmetrical openings that carve the surface like marks in the material itself. The result is a cabinet with an essential yet sculptural aesthetic, where function and form coexist in perfect balance.
