

## velaria

cabinet

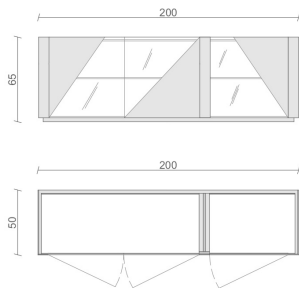

Velaria esplora il fascino del non completamente visibile. Una composizione di trapezoidi opachi e trasparenti costruisce una raffinata alternanza di pieni e vuoti, filtrando lo sguardo verso l'interno e trasformando il contenuto in parte integrante del progetto. Le geometrie attentamente bilanciate valorizzano il dialogo tra trasparenza e materia, conferendo al complemento una presenza sofisticata e contemporanea.

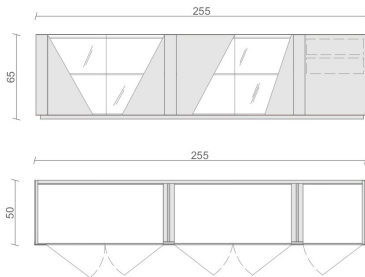

*Velaria explores the allure of what is not entirely revealed. A composition of opaque and transparent trapezoids creates a refined interplay of solids and voids, filtering the view into the interior and transforming its contents into an integral part of the design. The cabinet is crafted in lacquered MDF, flamed oak veneer, glass. The carefully balanced geometries enhance the dialogue between transparency and materiality, giving the piece a sophisticated and contemporary presence. Production is entrusted to skilled artisans who continue to preserve the authentic culture of craftsmanship and hand-made expertise.*
